

Name: _____

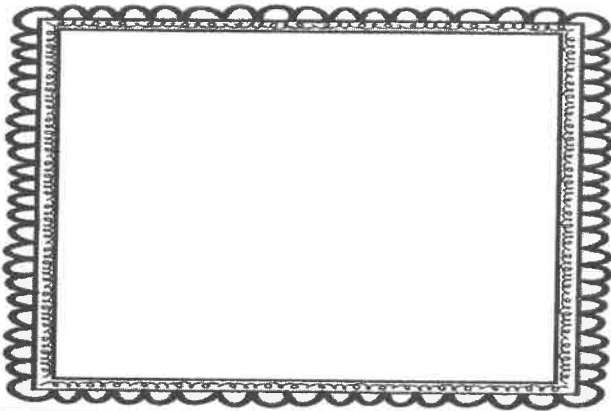

**Physical
Science**

Liquid

A liquid is a type of matter that moves smoothly and has no shape of its own. It can flow from one place to another. Milk, juice, water and oil are all different kinds of liquids.

Directions: Cut and paste the liquid matter.

--	--	--

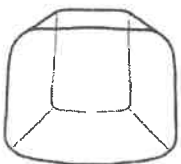

**Draw and write one other
type of liquid.**

Name: _____

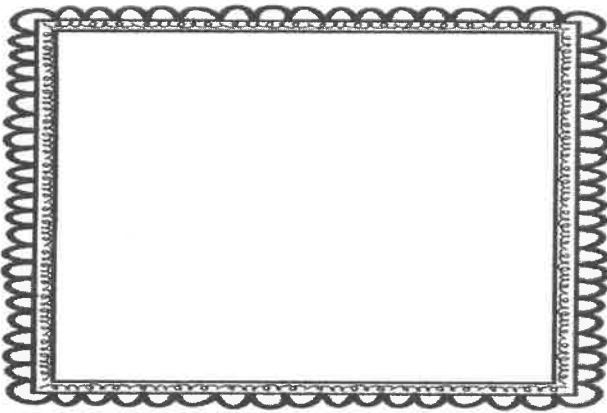

Physical Science

Solid

A solid doesn't change shape or move on its own. It stays in one place and we can usually see and feel them with ease. Your desk, chair, bed and toys are all solids.

Directions: Cut and paste the solid matter.

--	--	--

Draw and write one other type of solid.
